**RE: 40 CFR Part 60, NSPS Subpart OOOOa Date of Construction Notification**  
**Bargath LLC – Parachute Creek Gas Plant**  
**Permit No.: 02GA0014 – Issuance 1**

To Whom It May Concern:

Bargath LLC (Williams) is submitting this notification as required by 40 CFR §60.5420a(a)(1) of the New Source Performance Standards (NSPS) Subpart OOOOa for the Parachute Creek Gas Plant in Garfield County, CO.

On November 10, 2020, a letter of notification in accordance with §60.7(a)(4) was submitted describing the following prior to completing the OOOOa evaluation for the condensate system process unit. The project described herein results in additional fugitive components subjecting the process unit to the requirements of OOOOa. This letter is being provided in accordance with §60.7(a)(1).

Nature of Change: Installation of mixed liquids (condensate & produced water) storage tank emissions control device and loadout emissions control device. There are currently four (4) liquids storage tanks used to store plant liquids each with a capacity of 400 barrels (bbls). The tank vents are manifolded together to a common vent stack. Working and breathing emissions are vented to atmosphere through this common vent stack.

Present and proposed emissions controls: Presently, the emissions from these tanks are not controlled and go to atmosphere. The project change will install an enclosed combustor and route emissions from these tanks to the combustor to reduce emissions emitted to atmosphere. The change also includes the addition of a vapor recovery system to control emissions from the loadout of hydrocarbon liquids from the storage tanks. There is no change to the productive capacity of the facility as a result of these additions.

Commencement of Construction Date: December 7, 2020
